HAMZA ABUQIYAS

Junior Software Developer | .NET | ASP.NET Core | Angular

Amman, Jordan | +962 79 602 8686 | hselawe111@gmail.com | Open to Relocation

PROFESSIONAL SUMMARY

Software Engineering graduate and Junior Software Developer with hands-on experience in .NET application development, SQL Server, reporting, and full-stack web development. Experienced in C#, ASP.NET Core, Angular, Entity Framework Core, REST APIs, database development, and debugging application issues. Familiar with Agile development, Git, code reviews, and working with existing enterprise codebases.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, ASP.NET MVC, Entity Framework Core, LINQ, REST APIs, JWT Authentication
Frontend: Angular, TypeScript, HTML5, CSS3
Database: SQL Server, T-SQL, Stored Procedures, Relational Database Design
Reporting: RDLC / SSRS
Tools & Practices: Git, Azure Repos, Swagger, Postman, Agile, Code Review, Clean Architecture
Programming: C#, Java, C++, TypeScript
Languages: Arabic (Native), English (Professional Working Proficiency)

EXPERIENCE

Junior Software Developer — Diyar United Company

Amman, Jordan | Aug 2026 – Present

- Develop and maintain application features using C#, .NET, SQL Server, and stored procedures.
- Work on enterprise reporting functionality using RDLC reports, report parameters, filtering, grouping, and database-driven report data.
- Investigate and resolve application and reporting issues by tracing data flow between application code, database procedures, and report definitions.
- Modify and test SQL queries and stored procedures to support business requirements and report functionality.
- Use Git and Azure Repos for source control, branching, commits, and code delivery.
- Collaborate with team members to understand requirements, troubleshoot issues, and implement requested changes.

Web Development Intern — Bayanat

Amman, Jordan | Jul 2025 – Sep 2025

- Supported frontend and backend development tasks for real-world web application requirements.
- Participated in Agile development, code reviews, and collaborative implementation of application changes.

PROJECTS

Hasad — AI-Powered Crop Yield Prediction System

- Graduation project: served as Team Leader of a four-member team developing a full-stack crop yield prediction platform.
- Developed the web layer using ASP.NET Core, Angular, EF Core, and SQL Server.
- Built RESTful APIs for authentication, predictions, user management, administration, reports, and data management.
- Implemented JWT authentication and role-based authorization.
- Integrated the machine-learning prediction component with the application and database workflow.

EDUCATION

Bachelor of Science in Software Engineering

Applied Science Private University | 2022 – 2026

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, and Software Engineering Principles.

CERTIFICATIONS

- Full-Stack Coding Foundations — Microsoft / Coursera
- Angular 17 Overview & Basics — LearnQuest / Coursera
- Introduction to HTML, CSS & JavaScript — IBM / Coursera
